## FEATURES:

GLHL-SS (Left Hand)
Low temperature version -40C available GLHL-SS-FZ \& GLHR-SS-FZ

PROTECTION UP TO 125 METRES (410 FEET)
The GLHL/R-SS a robust Heavy Duty Safety Rope Pull Switch is designed to protect long conveyor lengths up to 125 m (2 switches) or up to 100 m using a single switch. The Stainless Steel 316 housings are designed specifically to withstand the tough environments found in the Food and Pharmaceutical industries. They will survive chemical and detergent washdown by providing all stainless steel parts and robust IP67 and IP69K sealing by using integral bellows and gaskets.
They can be used to complement the GLHD-SS (dual head) versions at each end of the rope span.

It is important that the first 500 mm is not used as part of the active protection coverage. If protection is required in this first 500 mm then it is recommended to use switches fitted with a mushroom type E-Stop button. IDEM also recommend when using a Safety Spring that a maximum of one corner pulley is used.
DIMENSIONS:

All Dimensions in mm

| this switch. |  |  |

For all IDEM switches the normally closed (NC) circuits are closed when the system is tensioned correctly and the switch has been reset.

Gold Plated Contacts available for low power circuits ( 5 V 5 mA ). Add GC to Sales Number e.g. 145005-A-GC
