IDEM INCH-3 Compact Safety Interlock switches are designed to provide position interlock detection for small moving guards. They are designed to fit to the leading edge of sliding, hinged or lift off machine guards.
The rugged Stainless Steel actuator profile is designed to match a cam mechanism to provide a positively operated not easily defeated interlock mechanism.
The compact body, 18 mm fixing profile and rotatable head make them easy to install where space is restricted.
The rotatable heads have dual actuator entry positions to give up to 8 different entry positions.
3 conduit entry points are available to give flexible mounting options. Contact blocks are replaceable.
